

# ACS COLLEGE TUKUM, CHANDRAPUR

---

**The five core values are so integral to the identity of our COLLEGE to focus on teaching to students:**

**Service:** Our gathering for any event, our staff pledges to serve in meaningful service a project, including cleaning up campus, NSS volunteering service to community often begins with recognition of the beauty of diversity.

- Do what you can to support the growth and success of your students.
- Grow and learn in a way that you would expect from the students in your classroom.

**Persistence:** Our blended learning models, in which we integrate technology into traditional teaching, our staff are recruited on their track record of persistence through challenge, both personally and professionally.

- Push your colleagues to grow along with you, but support, collaborate, and empower them on their path.
- Over-communication is better than under-communication.

**Achievement:** We celebrate College Mohatsav and Jayanti of Great People in our college, and our students spend that moment for their path to prospecting careers listening from community members about the unique and exciting jobs they have chosen.

- Take care of yourself so that you can better support others.
- Find joy in your work.

**Responsibility:** Students career to be responsible for their actions and who are encouraged to hold themselves, their peers, and their teachers to account on that point. Our students are well-versed in tools for conflict resolution.

- Take the work seriously but never take yourself too seriously.
- Share your passion with others so we can help students find their passion.

**Kindness:** Everyone should treat his/her peers with respect and dignity. They believe in the worth of their peers, no matter their socioeconomic background or the color of their skin.

- Find and develop strengths and talents first of your students and colleagues. Always start in the positive.
- Don't just value people but also ensure people know they are valued.
