**Dr.S.K.Gudadhe-Member**

**Miss.Rupa Sarkar-Researcher**

**Mr.Shahrukh Sheikh-Researcher**

**Preface**

Nature provides free services to all. In recent years, environmental problems have increased by human activities and development of science and technology and planet earth is facing tremendous pressure from increases in population. The planet is becoming warmer by most discussed phenomena, The “Global warming”. Quality of water, air, noise and soil is deteriorating beyond recovery. In order to know more about environmental degradation, there is need to identify them and implement mitigation measures for environmental protection.

Sustainable development is becoming popular in the world for saving the earth. Utilising resources in judiciously can save the earth's precious resources. Measurement of environmental components is the most effective step to conserve and protect natural resources.

Environmental auditing had begun in the early 1970s with provision of civil lawsuits for non compliance with environmental regulations. Green auditing involves on site visit, collection of samples, performing analyses, and report results to competent authorities. Industry, the corporate world is initiating auditing for saving natural resources. Academic institutions also can contribute to the preservation and conservation of resources within their premises.

In the present write up “Green Audit” report, outline existing scenario of campus. A brief content of

this report would help everyone to think about preserving resources, show willingness to learn their importance, adopt steps to minimize resource use and set an example for others to follow the path of green practices to achieve the goal of sustainable development.

We express our deep sense of gratitude to the Chairman of the of Dnyandeep Shikshan Prasarak Mandal, Dr. N. H. Khatri and management body of DSPM and Dr. S. B. Mohitkar, Principal of the college for their support in preparation of the report.

We would also like to acknowledge Dr. N.R.Dahegaonkar and Dr. P. M. Telkhade, NAAC coordinators for their encouragement in preparing the report. We are also thankful to Dr. Sushil B. Kapoor, for his whole hearted support.

### **Table of contents**

<b>Sr. No.</b>	<b>Title</b>	<b>Page no.</b>
1.	INTRODUCTION	4
2.	OBJECTIVES	4
3.	LAND USE OBSERVATION	5
4.	TREE SPECIES DIVERSITY IN THE COLLEGE PREMISES	5 to 6
5.	FAUNAL DIVERSITY IN COLLEGE CAMPUS	7
6.	AIR QUALITY OBSERVATION	7 to 8
7.	WATER MANAGEMENT	8 to 10
8.	NOISE QUALITY ASSESSMENT	11
9.	SOIL QUALITY ASSESSMENT	12
10.	E-WASTE DISPOSAL AND MANAGEMENT	12
11.	SOLID WASTE MANAGEMENT	12

## **1. Introduction**

Auditing is an evaluating system of college in terms of internal controls for achieving goals. Planning, on-site work, audit report preparation, and follow-up are the most essential stages of the auditing process. College, in addition to imparting education is committed to environmental protection by reducing environmental impacts such as reducing waste, water and energy consumption. The basic motive is to inspect ongoing processes in college whose exercises can be harmful to the health of students, all workforce and environment. Our intention is to achieve environmental sustainability by implementation of better environmental sound practices.

Planning of preparation of Green Audit involves comprehensive steps of observation and verification by on-site visit. Planning process started with a discussion among committee members, the objectives were framed, the methodology followed by sampling and final report preparation ended with a number of initiatives to be undertaken for environmental sustainability.

## **2. Objectives**

Objectives are significant to enhance our vision which further converts in the measurement of environmental components for achieving goals. Earth's natural resources are important to support life, but its overexploitation can lead to disturbance of the natural balance. In present time, conventional auditing supported by Green Auditing may assist the college to manage environmental resources by effective environmental mitigation measures. The following objectives are systematic attempt to reach at a target which could guide us for safe and clean environment for all.

1. To observe land use for various purposes.
2. To record and document tree species and faunal diversity in the college premises.
3. To assess an air quality
4. To assess water quality
5. To record noise level in the college premises and outside area.
6. To assess soil quality of the college campus.
8. To prepare report on E-waste disposal and management.
9. To study solid waste management practices in college campus.

## **3. Land use observation**

The total area of Arts, Commerce & science, College is 10100 sq. meters out of which the built up area is 1908.397 sq. meters and open space & plantation area is 4691.6 and 563 sq.meters. Based on finding, it can be concluded that college campus covered with vegetation is adequate to curb pollutants from the air.

#### 4. Tree species diversity in the college premises

Most of the trees are planted keeping in mind to reduce carbon dioxide from the atmosphere. Trees of the college campus are effective to stabilise soil, it provides habitat for diurnal as well as nocturnal animals, gives shelter to invertebrates. Trees of college campus protect students from different colleges from heat waves in summer during the university examination. Aesthetic quality is maintained by planting ornamental trees. The plantation programme had been implemented since inception of the college. The following tree species are observed during on- site visit.

**Table1.List of Tree species in the college premises**

**Table: - List of Trees in the college premises**

S. N.	Vernacular Name	Botanical Name	Family Name	Number
1.	Teak (Sagwan)	<i>Tectona grandis</i>	<i>Verbenaceae</i>	03
2.	Karanj	<i>Pongamia pinnata</i>	Fabaceae	06
3.	Shisam	<i>Dalbergia sissoo</i>	Fabaceae	02
4.	Gulmohar	<i>Caesalpinia species</i>	Caesalpinioideae	01
5.	Gulmohar (Yellow Flame)	<i>Peltophorum pterocarpum</i>	Caesalpinioideae	01
6.	Neem	<i>Azadirachta indica</i>	Meliaceae	05
7.	Jamun	<i>Syzygium cumini</i>	Myrtaceae	01
8.	Nilgiri	<i>Eucalyptus species</i>	Myrtaceae	02
9.	Ashoka	<i>Saraca indica</i>	Caesalpinioideae	04
10.	Ghanti	<i>Cascabela thevetia</i>	Apocynaceae	01
11.	Cotton Silk	<i>Ceiba pentandra</i>	Malvaceae	03
12.	Sitaphal	<i>Annona squamosa</i>	Annonaceae	01

13.	Vidya	<i>Thuja species</i>	Cupressaceae	02
14.	Fire craker plant	<i>Hemelia patens</i>	Rubiaceae	01
15.	Jungle Flame	<i>Ixora coccinea</i>	Rubiaceae	01
16.	Pygmy date Palm	<i>Phoenix roebelenii</i>	Arecaceae	06
17.	Dracaena	<i>Dracaena fragrans</i>	Asparagaceae	01
18.	Colcasiaesculanta	<i>Xanthosoma sagittifolium</i>	Araceae	02
19.	Shatavari (Musli)	<i>Asparagus racemosus</i>	Asparagaceae	01
20.	Tradescantia	<i>Tradescantia pallida</i>	Commelinaceae	01
21.	Boat lilly	<i>Rhoeo discolor</i>	Commelinaceae	01
22.	Cactus	<i>Euphorbia trigona</i>	Euphorbiaceae	01
23.	Bougainvillea	<i>Bougainvillea</i>	Nyctaginaceae	02
24.	Acalypha firestorm	<i>Acalypha godseffiana</i>	Euphorbiaceae	01
25.	Nilkaranj	<i>Strobilanthus crista</i>	Acanthaceae	02
26.	Wild	<i>Streliticia augusta</i>	Strelitziaceae	02
27.	Purple star	<i>Psuederanthemum latifolium</i>	Acanthaceae	01
28.	frangipani	<i>Plumeria rubra</i>	Apocynaceae	02
29.	Giant elephant ear	<i>Alocasia gigantea</i>	Aracaceae	02
30.	Arrow head	<i>Syngonium podohyllum</i>	Aracaceae	03
31.	Spider ivy	<i>Chlorophytum comosum</i>	Asparagaceae	02
32.	Redbird flower	<i>Euphorbia tithymaloides</i>	Euphorbiaceae	02

33.	Mehandi	<i>Duranta erecta</i>	Verbenaceae	06
34.	Weeping fig	<i>Ficus benjamina</i>	Moraceae	01
35.	Mock orange	<i>Murraya paniculata</i>	Rutaceae	01
36.	Snowbush	<i>Breynia disticha</i>	Phyllanthaceae	01
37.	Bhrungaraj	<i>Sphagneticola trilobata</i>	Asteraceae	01
38.	Almond	<i>Prunus dulcis</i>	Rosaceae	01
39.	Croton	<i>Codiaeum variegatum</i>	Euphorbiaceae	02
40.	Giloy	<i>Tinospora cordifolia</i>	Ranunculaceae	02
41.	Ponytail palm	<i>Beaucarnea recurvata</i>	Asparagaceae.	01
			<b>Total</b>	<b>82</b>

### 5. Faunal diversity in the college premises

The faunal diversity consists of both invertebrates and vertebrates. Invertebrates have occupied every ecological niche. Vertebrates depend on invertebrates for food. It is very essential to record their existence for balance of nature. Presence of vertebrates and invertebrates were simply noted by sighting. The faunal diversity sighted and observed at different time interval is depicted in Table 2

**Table 2: Faunal diversity of college campus**

Sr.No.	Fauna	Scientific Names
1.	Spiders	Artema Atlanta; Hersilia savignyi; leucauge decorate; Nephila pilipes.
2.	Butterflies	Hasora chromus; Hasora taminatus; Hasora vitta; Badamia exclamationis; Burara jaina; Hasora badra; Suastus gremius.
3.	Insects	Onitis, Phalops, Chironitis, Gymnopleurus Parvus,
4.	Mammals	Bat(Chiroptera Spp.), Squirrel (Funambulus)
5.	Birds	Acridotheres tristis (Common myna); Pycnonotus cafer (Redvented Bulbul), Dicrurus Macrocerus (Black Drongo), Sparrow (Passeridae Spp.) House Crow(Corvus Splendens)
6.	Amphibia	Tree Frog (Polypedates Maculatus), Indian Toad (Duttaphrynus Melanostictus)
7.	Reptile	Wall Lizard(Hemidactylus Frenatus), Calotes Versicolor

**Figure 1: A green view of college campus**

## **6. Air quality in college campus**

The climate of Chandrapur has a hot and dry. December is the coldest month, with a minimum average temperature of December is 9 °C and a maximum average temperature remain around 23.2 °C. The mean maximum temperature of the month May is 43 °C. June and September are the months of monsoon. Chandrapur's average annual rainfall is 1249.4 mm. (India Meteorological Department, May 2013). The Air quality observed was fairly good as there was less transportation in the campus.

## **7. Water management**

Water quality of working place is paramount as it is related to human health and livelihoods of people. Supplying clean and reliable water supplies is a prime necessity. The source of drinking water supply is majorly ground water and privately owned R.O. (reverse osmosis) supplier. The ground water is treated by R. O. unit on the ground floor and first floor prior being used by students and staff. Water after use is directed towards the area which goes to the plantation, so water is utilized. Rainwater harvesting unit installed at front side is working with maximum percolation of rain water. Water used in laboratories comes out as waste water is diluted prior to disposal in sewer line where it mixes with sewage. Ground Water required for drinking and laboratory purpose is analysed for physical and chemical parameters. Department of the College makes use of Air conditioners, water as distilled water brought from the city which is free, so burden of production of distilled water by conventional distillation is minimized with a saving of capital plus electricity. Water consumption in the campus was insignificant during assessment period 2020-2021.

## **8. Noise quality assessment**

Noise Quality Measurement is the most important part of the noise control program. It imparts information about potential noise generating places in workplace, students and staff likely to be affected. Noise measurement during busy hours gives valuable numbers which may be useful for planning, avoiding, controlling noise at the workplace. Following noise measurements made at different locations is useful to consider noise if there is a noise problem in the workplace.

### **Table 3: Noise level measurement**

<b>Location</b>	<b>Noise Level (Decibel-dB)</b>
First floor	30
Open passage- First floor	35
Ground floor	40
Library	25
Open Ground	45
College Office	45
Outside entry gate	50

It is observed that noise level outside entry gate is higher than rest of locations, as the entry gate is situated adjacent to Durgapur road.

### **9. Soil quality assessment**

The purpose of Soil quality assessment is to protect and improve soil in campus, increase its fertility for plant growth. The basic thing about soil is content of organic matter in it which is important in maintaining soil quality. Litter fall in plantation area is altogether sufficient to maintain soil organic matter.

### **10. E-waste disposal and management**

The use of electronic equipments is growing faster due to advancement in technology. The quantity of E-waste generation is increasing as people buy advance electronic equipments while dumping old one. E-waste carries health risks as it contents toxic materials such as cadmium, chromium, PCBs. E-waste generation is minimum in college campus. E-waste generated in college is simply handed over to scrap collector as proper e-waste collection facility is not available in the city.

### **11. Solid waste management**

Solid waste is heterogeneous material and hence need to be disposed of systematically with due care of the environment. Solid waste generated in college comes from administrative office and the campus. Solid waste generated in college is segregated and put into collection bins marked as green and blue. Chandrapur Municipal Corporation has made arrangement to collect solid waste. Solid waste generation was minimum as observed in session 2020-2021.
